

Ruby on Rails Engineer

Take your Rails skills to the next level. Work in a real TDD environment. Learn to solve tough problems.

You're qualified to apply if you have:

- Strong Ruby programming skills
- Ruby development frameworks: Sinatra, Ruby on Rails, Padrino, etc.
- Experience building scalable, rich web applications
- English-language skills
- A working style that thrives in a highly collaborative environment

The ideal candidate has:

- JavaScript and jQuery skills
- Test-driven development experience (rspec, cucumber, capybara)
- Experience building REST-based APIs and services
- Some experience with frameworks like AngularJS, Backbone, Ember.js, etc.

Based in recently-renovated office space in the desirable El Poblado neighborhood of Medellín, AltaVista Editores is looking for talented programmers to fill full-time, permanent contract positions on a collaborative and thriving development team.

AltaVista offers stability, friendly and supportive colleagues, and a work environment that favors a regular schedule and a good work-life balance rather than demanding long, high-pressure work hours. Our team of professionals provides services to an American educational publisher, Vista Higher Learning, known for its innovative and market-leading technology. We provide a competitive compensation plan including base salary and an outstanding benefits package.

If you don't meet all those requirements, no problem—get in touch with us anyway. If you are a good match for our team, we can look at providing training to help you get up to speed.

If you are interested in this exciting opportunity in a growing company, please send your CV and salary requirements to: jquintero@altavistaed.com today! All applications must be submitted in English in order to be considered.

Front End Engineer

You're qualified to apply if you have:

- Strong javascript programming skills
- Experience building scalable, client side applications
- Experience with frameworks like AngularJS, Backbone, Ember.js, AmpersandJS, Meteor.js, etc
- Experience with libraries like EaselJS, TweenJS, D3, etc

- English-language skills
- A working style that thrives in a highly collaborative environment
- Experience working with javascript profiling tools: Firebug, developer tools, spy-js, etc

The ideal candidate has:

- Actionscript programming skills
- Test-driven development experience (Jasmine)
